- \* Depending on the environment of the PC being used, reading and writing the USB flash drive may slow.

# **Chapter 3 Java Installation**

### Java Runtime (JRE) and Java Development Kit (JDK) / Java 8 Check

Java 8 Check Procedure

Before installing Android Studio you must have Java 8 installed on your machine.

- 1. Please use Mozilla Firefox and visit www.java.com to determine if you have Java installed.
- 2. Select "Do I have Java?"
- 3. Click Verify Java Version and follow the instructions.
- 4. If you do not have Java 8 or the latest version, the Java website will prompt you to download the file you need. If you are not taken directly to the downloads page, you may access it here: http://java.com/en/download/

### JRE and JDK Procedure

- 1. Go to http://www.oracle.com/technetwork/java/javase/downloads
- 2. Click the **Java icon** toward the top left of the page

- 3. Select Accept License Agreement and download the file based on your machine's architecture. Download the Development Kit. Do not download the Demos and Samples.
  - Windows Users: If you are unsure of whether your system is 32 or 64 bit please visit this link for information on how to locate this information:https://support.microsoft.com/en-us/kb/827218
